Remove AI Slop

This prompt will remove a large number of issues commonly associated with AI-generated code. It is one of the most frequently used prompts internally at Cursor [1]

```
# Remove AI code slop

Check the diff against main, and remove all AI generated slop introduced in this branch.

This includes:

- Extra comments that a human wouldn't add or is inconsistent with the rest of the file
- Extra defensive checks or try/catch blocks that are abnormal for that area of the codebase (especially if called by trusted / validated codepaths)
- Casts to any to get around type issues
- Any other style that is inconsistent with the file
```
