

Batteries 101

Truly a topic that deserves a lot of attention.

This past season (2025 Reefscape) has been the year of battery fails. Having to redo our battery set TWICE at competition really makes it apparent how important it is to set these right. Being able to create, implement, and routinely use batteries is important. It is more important to do all of these steps correctly.

For this section of the Competition Book, please refer to the information in the [Electrical Book \(Battery Chapter\)](#)

Be sure you are preparing batteries correctly, using them correctly, and appropriately handling issues you may have with them!
