

UI/UX Basics

What is UI/UX?

These are perhaps two of the most fundamental concepts in developing for the web, and can make or break a site/application.

- UI - User Interface
- UX - User Experience

Difference Between UI and UX

User Interface	User Experience
Colors & Fonts	Target audience & users
Interactivity	Flow of site/app
Layout	

[Here's an article from Figma that explains the differences.](#)

Fundamentals of UI/UX

The following is a great crash course into the world of UI/UX, and how to get started with learning design.
